Paper Mache

Paper mache, originally papier-mâché, is a piece of creative work made from a composite of paper pieces and pulps stuck together with glue, starch, or wallpaper paste. This kind of artwork existed since 200 B.C. in China and is now often present in ceremonial and traditional events.

Imaginative

Piecing together a paper mache sculpture is essentially creating a masterpiece with chaos – the wrinkled paper patterns give the piece more depth and disorder at the same time while keeping it simple and elegant.

Medley

T850 Paper Mache brings these paper-based artworks into interior design by incorporating patterns of the crumbled paper texture on each carpet tile, and piecing them together for an indoor space would be as if piecing together a paper mache.
