FOR

TUNTEX™

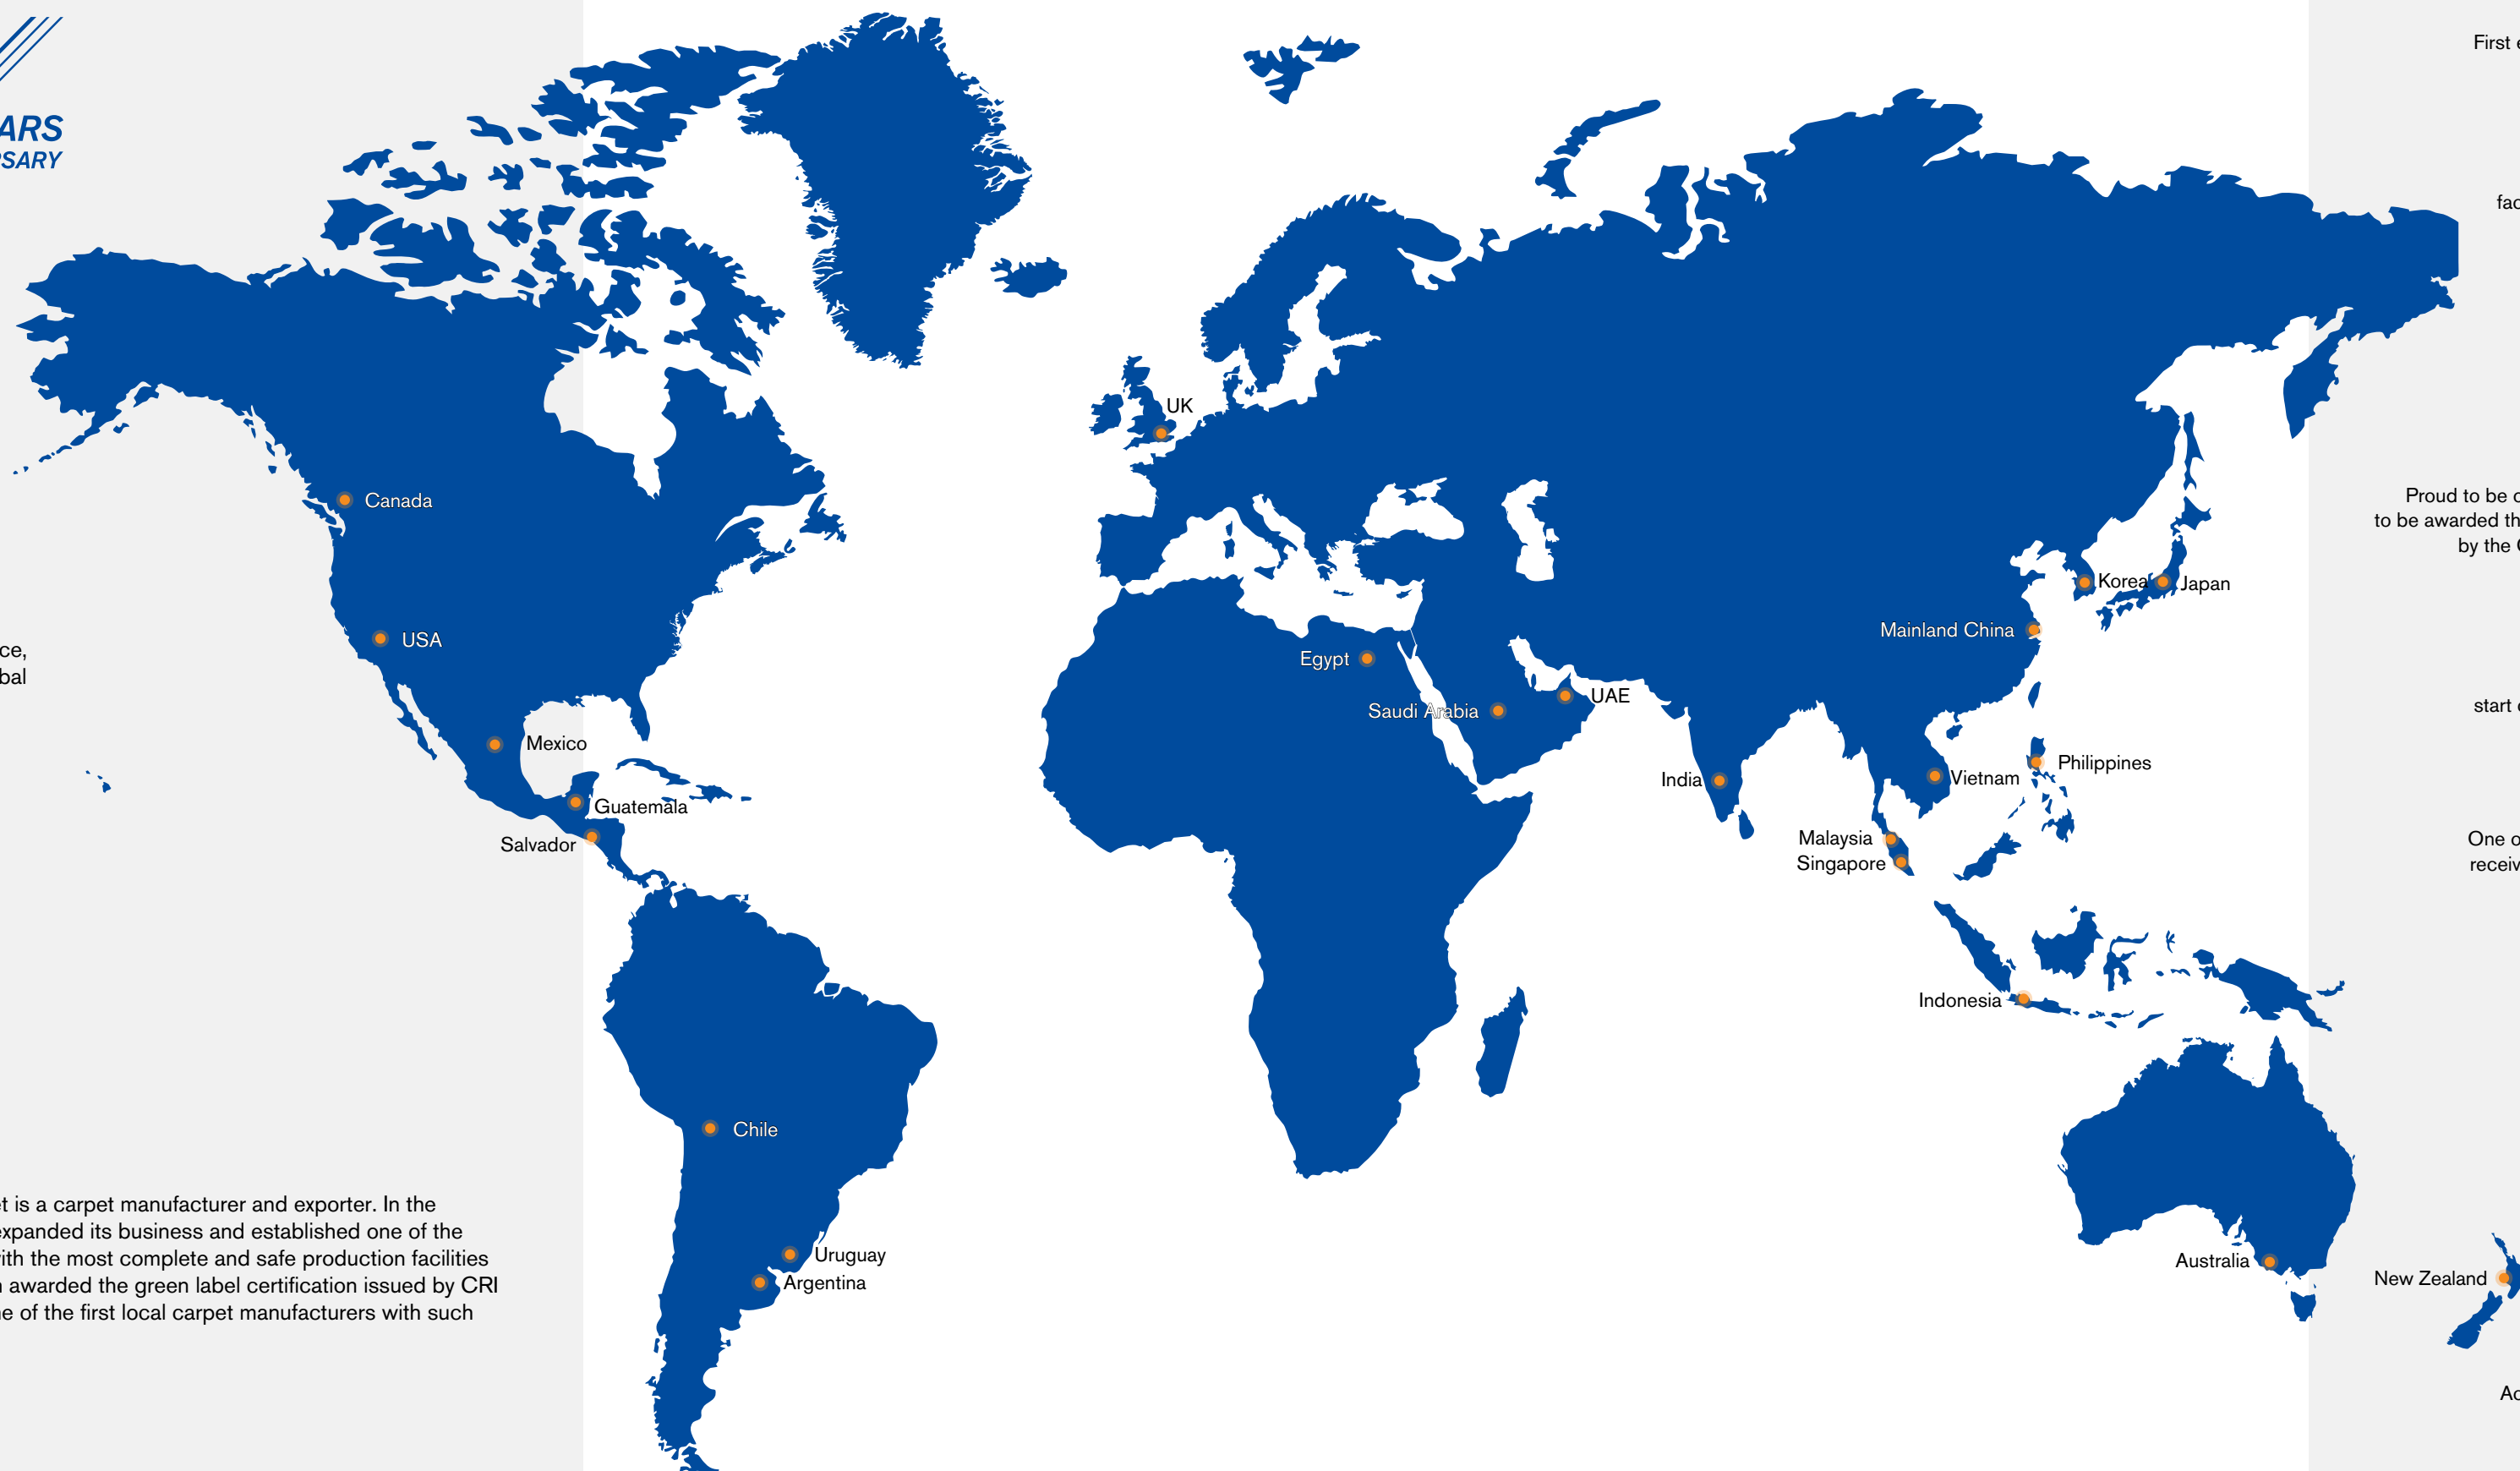

**A leading carpet manufacturer
dedicated to green technology and
environmentally friendly
production methods.**

56
YEARS
ANNIVERSARY

With more than 56 years experience, Tuntex has become one of the global leaders in the industry.

Established in 1968, Tuntex carpet is a carpet manufacturer and exporter. In the following decades, the company expanded its business and established one of the first large-scale carpet factories with the most complete and safe production facilities in China in 1994. Tuntex has been awarded the green label certification issued by CRI in the United States, becoming one of the first local carpet manufacturers with such certification.

1968

First established as a manufacturer of carpets.

1994

Opens one of the largest production facilities by floor area in the whole of China.

1995

One of the first carpet manufacturers to implement waste water recycling.

2008

Proud to be one of the first local carpet manufacturers to be awarded the coveted Green Label Plus certification, by the Carpet and Rug Institute (CRI) in the US.

2012

One of the first carpet manufacturers to start closed-loop recycling for modular carpet.

2015

One of the first carpet manufacturers in Asia to receive Third Party certification on recycling by US GreenCircle Certified.

2017

Proud to be one of the first carpet manufacturers worldwide to obtain a Verified HPD.

2021

Marking a milestone in Tuntex's research and development with the launch of aircell™.

2023

Achieving revolutionary upgrade to backing system with the release of LuxCushion™.

Innovative

Tuntex is always on the look out for technological opportunities that can bring more value to our partners and customers. For Tuntex, it is the mindset of constantly challenging ourselves, and reshaping what we think we know.

TECHNOLOGY

DESIGN

SUSTAINABLE

01

nexlon™

nexlon™ is a premium quality nylon fiber developed and manufactured exclusively by Tuntex. By applying Solution Dyed Technology, it mixes and melts colors together. nexlon™'s consistent and solid color fastness ensures long-time visual enjoyment.

02

LUXCUSHION™

LuxCushion™ is a unique backing system released by Tuntex. By converting high resilience nylon fiber into unique backings, LuxCushion™ redefines the softness of carpets, taking performance and comfort experience to the next level. Underfoot comfort and true environmental benefits are finally here.

01 nexlon™

Tuntex is one of a very few carpet manufacturers that are completely vertical, with our ability to manufacture in-house Solution Dyed Nylon - nexlon™.

Tuntex's strong capabilities enable more types of yarns to be developed to meet the changing trends.

There are over 200 colors that can be provided by nexlon™ based on market demands.

nexlon™ is available for recycling to produce new yarn, backing, and carpets.

Premium Solution Dyed

nexlon™ is manufactured using Solution Dyed Technology. This method mixes and melts colors together to achieve a consistent and solid color fastness. As a result, the yarn has excellent resistance to fading even using harsh cleaning methods.

Nylon Chips

Masterbatch

Outstanding Color Fastness

Soak one end of the carpet sample into the diluted bleach water for 30 minutes:

Solution Dyed

Before

After

White Yarn

Before

After

Our study found that even using a bleach solution, Tuntex carpet always has excellent color fastness. It ensures that the product can be used for a long time and remain beautiful, bringing lasting fresh visual enjoyment.

R&D

aircell™ is an innovative hollow filament fiber that is developed and manufactured exclusively by Tuntex. The combination of the Triangular cross-section, Hollow structure and Y-Shaped configuration provides enhanced performance, easier maintenance and long lasting durability to our carpets.

Unique Yarn Configuration

The cross-section of aircell™ filament is designed as a triangular structure with smooth surface. The hollow structure comes in a three-hole shape, allowing air to be trapped in the voids, increasing the overall volume of the filament.

aircell™ utilizes a premium solution dyed nylon, the same as all nexlon™ products, but the molecular structure of its polymer has been modified to enhance its spring effect, and hence achieve better resilience and durability for the carpets.

Technical Strength

Improved Resilience

Enhanced structure results in better resilience

Increased Bulkiness

At same weight, aircell™ provides more volume than typical yarn

Soil Releasing

Smooth surface, prevent soil accumulation

Soil Hiding

As light hits a typical fiber, there is less light reflected, more going through, therefore, results in visible soil and dirt.

As light hits the aircell™ fiber, light is reflected back in different directions, results in lower soil visibility.

Light is reflected, lower soil visibility

Key Benefits

Better Performance

Tuntex is always committed to a high-quality standard and premium performance. With aircell™, Tuntex is able to further improve its carpet performance by increasing the bulkiness and resilience significantly, providing customers with better products than ever before.

Easier Maintenance

As aircell™ can minimize soil accumulation, this reduces the chance of soil penetration into or beneath the fibers. Soil then stays on the surface, which makes cleaning and maintenance much easier for carpet users.

Increased Durability

aircell™ features a unique hollow structure that improves resilience and reduces the appearance of soil, which helps carpet remain new longer, retain its bulkiness longer, and extend its usable life.

aircell™

More Bulk
More Bounce
More Benefit

Revolutionary New Backing System

Creative Backing Structure

- 1 nexlon™ – premium solution dyed nylon
- 2 Reinforced fiber glass
- 3 Repurposed high resilience nylon

Different from typical backing systems, LuxCushion™ repurposes high resilience nylon that is a byproduct PU yarn wasted during carpet manufacturing process. Compared to typical felt or foam backing, LuxCushion™ shows a superior resilience performance thanks to its unique 3D structure. Tufted like "springs", LuxCushion™ provides better underfoot comfort for indoor environment.

Patented Technology Unique Sandwich Design

LUXCUSHION

the Patent Number
Chinese Patent No.: ZL 202020360039.5
United States Patent No.: US 11,668,046B2

Design For Comfort

Underfoot Comfort

The usage of high resilience nylon allows LuxCushion™ to offer adequate space to squeeze and bounce back with firm foot supports. It improves comfort level by about **30.2%** and reduces foot fatigue by about **19.8%**.

Acoustic Comfort

With the thick layers of nylon fibers, LuxCushion™ disperses the unwanted noise in the environment. It has been tested and found to be very effective in reducing transmitted impact sound by **37dB**, which is **5** times better than LVT and **50%** better than typical backing. In addition, LuxCushion™ has a sound absorption coefficient of **0.40**, indicating impressive sound absorption capabilities.

Long-lasting Comfort

LuxCushion™ possesses an excellent recovery rate of **91.7%** after an extremely heavy traffic test. The comfort level has been developed to support our wellness goals in the long run.

Indoor Comfort

The unique structure of LuxCushion™ requires fewer materials during production, is plasticizer-free, and has very low TVOC. Special treatments are added to further enhance this product. LuxCushion™ helps to mitigate these health hazards and create a safer and healthier indoor environment.

Design For Future

Tuntex has always been seeking green manufacturing through continuous innovations. The concept of sustainable development also runs through the research and development of LuxCushion™.

Tuntex collects directly and converts these wasted yarns into available materials for the production of LuxCushion™ which maximizes the resource efficiency.

Both the face yarn and the backing are 100% recyclable to create the green cycle of carpet production.

LuxCushion™ repurposes high resilience nylon that is a byproduct from yarn wasted during the carpet manufacturing process and directly reproduces into the backing in the original factory. Energy, resources and carbon emissions that were required in the past have been decreased to protect the environment.

01

Prestige Line

Prestige is the culmination of Tuntex art, design and craftsmanship. We carefully considered the concepts, aesthetics, styles and colors, bringing together to create excellence carpets. Indeed, Prestige is viewed as the very best of the brand.
