**We create carpets
to elevate comfort, to improve
the functional and aesthetic experience
of any environment.**

Premium Quality – Craftsmanship & Advanced Manufacturing

55 +
years

With over 55 years of experience, we blend craftsmanship with modern technology to infuse every carpet with exceptional quality, innovation and value.

1968

First established as a carpet brand

1994

Launched a full-scale production facility in mainland China

1995

Implemented advanced wastewater treatment systems

2008

Became one of the first carpet brands to earn the prestigious Green Label certification from the Carpet and Rug Institute (CRI), U.S

2012

Pioneered a comprehensive sustainability framework, driven by the 3R principle (Reduce, Reuse, Recycle), integrating products, materials, and production processes

2017

Declare Health Product Declaration (HPD) to ensure product transparency and material health disclosure

2021

Unveiled aircell™, an innovative yarn featuring a unique triangular hollow structure, dramatically enhancing carpet performance

2023

Launched LuxCushion™, a next-generation carpet backing system designed to elevate both comfort and the overall spatial experience

2024

A new factory has been launched in Yangzhou, Jiangsu Province, further promoting sustainable development and innovation

We own two campuses totaling 50,000 m², establishing a fully vertical process from R&D and raw material to finished products. The core value of vertical integration is embedding quality control into every stage, delivering high-quality products, stable supply, and customized service through full-chain management.

With advanced automation and equipment—including German BCF extrusion and US CMC Colorpoint tufting machines—we infuse excellence into every process. Cutting-edge technology integrates across manufacturing, crafting consistent, high-performance, aesthetically refined flooring masterpieces.

Product Development

From innovative yarns to precise extrusion, upgraded backings to creative patterns—our full-chain expertise shines in every carpet.

Color Masterbatch Matching

By blending nylon chips with color masterbatch in-house, we achieve consistent, precise coloration at the fiber level, ensuring design accuracy and reliable quality across every batch.

BCF Yarn Processing

Nylon chips and masterbatch pigments are melted, extruded into BCF, and processed into yarn—ensuring consistent, durable, sustainable fibers.

Tufting

High-speed tufting machines stitch yarn onto the backing with precise control over pile height, density, and patterns, while advanced systems minimize waste and enable intricate designs.

Backing

We laminate two layers of PVC with a fiberglass sheet in between, creating a reinforced structure that delivers stability and long-lasting support.

Packaging

Intelligent packaging automates efficiently with traceability, ensuring accuracy, better shipping efficiency, and quality assurance.

From yarn to finished products, each stage undergoes rigorous inspection with precise instruments and professional QC standards.

Our 12-key-metric quality control system tests tuft bind, colorfastness, wear resistance, and other core properties to ensure long-term stability and outstanding performance

Product Innovation – In-house R&D & Aesthetic Design

Innovation-driven, we infuse comfort into every carpet. By exploring materials and craftsmanship, we create flooring that meets function and elevates spatial experience.

Tuntex is one of the few companies in China with fully integrated production capabilities, developing its own high-end solution-dyed nylon yarn, Nexlon, available in various textures, colors, and lusters to meet diverse spatial needs.

Made to Last

aircell™

aircell™, part of the Nexlon yarn family, is an advanced nylon yarn developed and produced by Tuntex. Its stable triangular cross-section, hollow structure, and resilient Y-shaped support optimizes carpet performance.

More Bulk
More Bounce
More Benefit

Unique Yarn Configuration

- ✓ Triangular Shape Soil Releasing 
- ✓ Hollow Structure Increased Bulkiness 
- ✓ Y-Shape Structural Support Improved Resilience 

Better Performance

Tuntex is always committed to a high-quality standard and premium performance. With aircell™, Tuntex is able to further improve its carpet performance by increasing the bulkiness and resilience significantly, providing customers with better products than ever before.

Easier Maintenance

Compared to traditional trilobal filaments which have crevices, the smooth triangular surface of aircell™ minimizes soil accumulation, this makes cleaning and maintenance much easier.

Increased Durability

aircell™ features a unique hollow structure that improves resilience and reduces the appearance of soil, which helps carpet remain new longer, retain its bulkiness longer, and extend its usable life.

LUXCUSHION™

01 Carpet surface:
nexlon™ – premium solution dyed nylon

02 Composite:
Laminated with Reinforced Fiber Glass

03 Bottom:
Repurposed high resilience nylon

LuxCushion™ is a proprietary soft cushion backing developed by Tuntex. After 8 years of R&D, we broke through technical barriers by replacing traditional backing materials with high-resilience nylon yarn. This significantly boosts the carpet's support and resiliency—enhancing the overall sense of indoor well-being and achieving a harmonious blend of comfort, health, and sustainability.

Patent Number

United States Patent: No.US 11668046B2
Chinese Patent: ZL 2020 1 0199802.5
International Patent Application: No.PCT/CN 2020/081288

In our advanced innovation center, we continuously explore flooring solutions centered on health and well-being, blending comfort with sustainable performance for harmony between people and the environment.

Backed by a multicultural team from China, Japan, and Australia, we create a global design language that meets evolving aesthetic and functional demands.

With over a thousand carpet surface colors, patterns, and textures to choose from, we offer a diverse range of carpet tile designs.

Product Sustainability – 3R Concept: Sustainable Production Practices

Tuntex practices 3R (Reduce, Reuse, Recycle) to cut waste, lower environmental impact, boost resource efficiency, and pursue closed-loop recycling.

Reduce

Reducing resource usage and carbon footprint is one of the effective measures to protect the environment. Tuntex has taken action to fulfill this mission through green manufacturing.

- ◆ Premium Solution Dyed method for yarn reduces sewage discharge.
- ◆ Equipped with on-site waste treatment to prevent pollution.
- ◆ Being ISO14001 certified, we implement green production for sustainable development.

Reuse

Through the practical reuse of discarded materials and waste, Tuntex minimizes the environmental impact while extending the lifespan of our products.

- ◆ Waste requires minimal processing and is converted into value-added products, including LuxCushion™ and Circular nylon yarn.
- ◆ Packaging materials and transportation accessories are used multiple times to reduce one-time waste.

Recycle

Recycling maintains a balance between production and consumption. Every step in the production process is closely linked, making the system organic.

- ◆ Achieved a closed-loop recycling process : resource - product - recycle.
- ◆ Waste materials are repurposed from the production of yarn, soft cloth, and backings.

Product Comfort – The Ultimate Pursuit of Multi-sensory Experience

We respond to the essential needs for ideal office environments by creating professional comfort experiences. A soft carpet supports every step while gently wrapping the pace and emotions of daily life. Quietness, relaxation, and a sense of being cared for flow through the space, bringing both body and mind into balance.

From the delicate texture to the calm style to the layered interpretation of color — every detail is waiting to be discovered...

PRESTIGE LINE

Prestige is the culmination of Tuntex art, design and craftsmanship. We carefully considered the concepts, aesthetics, styles and colors, bringing together to create excellent.

OVERVIEW I - COLLECTIONS

AFTER-RAIN

Collection

After-Rain Collection captures the atmospheric clarity of post-rain light. By pairing a palette of balanced neutrals with muted warms, this collection introduces a rhythmic color logic to the interior landscape. Three distinct styles are engineered for functional versatility across open, transitional, and private zones, providing seamless spatial navigation through a unified aesthetic language.

VOLCANIC

Collection

The Volcanic Collection channels the raw beauty and untamed power of the earth's most dramatic natural events. Inspired by the flowing magma, explosive eruptions, and deep fissures shaped by volcanic activity, each design captures a unique moment in nature's transformation. With dynamic lines, organic shapes, and rich, layered colors, the collection brings a sense of movement and energy to interior spaces.

MOYIN

Collection

The color inspiration for this series comes from traditional Chinese Art, selecting warm and soft Eastern tones such as indigo, turquoise, and greige. These colors can reduce visual pressure and promote mental relaxation. Meanwhile, paired with the newly launched LuxCushion™ Air backing, it provides just the right amount of support to deliver a comfortable underfoot experience.

FOLIAGE

Collection

Foliage Collection is inspired by the rich and vibrant hues of the fall leaves. Imagine taking a stroll outdoors and being completely mesmerized by the stunning array of falling leaves as they change from vibrant greens to warm oranges, deep reds and lush golds. Masterpieces of nature, these scenes showcase an incredible spectrum of color that is truly a sight to behold.

GINKGO

Collection

Ginkgo Collection transforms the ephemeral beauty of golden ginkgo leaves dancing in the wind into a rich narrative woven into commercial spaces. This collection spins the dialogue between ginkgo and wind into a tapestry of yarn and texture.

SCENIC Collection

Scenic Collection maps ambiance symbols to the carpet design, and concretizes the vague emotions into independent and matching patterns and colors. At the moment of stepping into the space, the carpet uses the rich product combination and exquisite design itself to leverage the understanding of beauty.

ORIENTAL Collection

Oriental Collection draws inspiration from the timeless beauty of classic Eastern motifs—the delicate Blossom and the resilient Bamboo. Each design is elegantly rendered in a variety of serene colors, embodying a sense of tranquil sophistication. Together, these patterns create a harmonious blend of foundational tones and nature-inspired elegance, bringing a touch of serene Eastern artistry to any space.
