Stars to Guide, Ground to Greet.

Homeward is a visual narrative exploring the relationships between people, space, and scale:

This design originates from observations of the post-pandemic social landscape. The overexpanded digital realm has deepened collective isolation. Burdened by endless information, people suffer from digital fatigue and long to reconnect with the physical world.

At its heart, Homeward employs flooring materials to re-establish bonds between humans and reality. The cosmic viewpoint mirrors our isolation in the digital era, while the urban perspective honors tangible, genuine encounters. As people walk, gather and interact atop solid flooring, they regain physical mobility and rediscover the warmth of communal belonging.

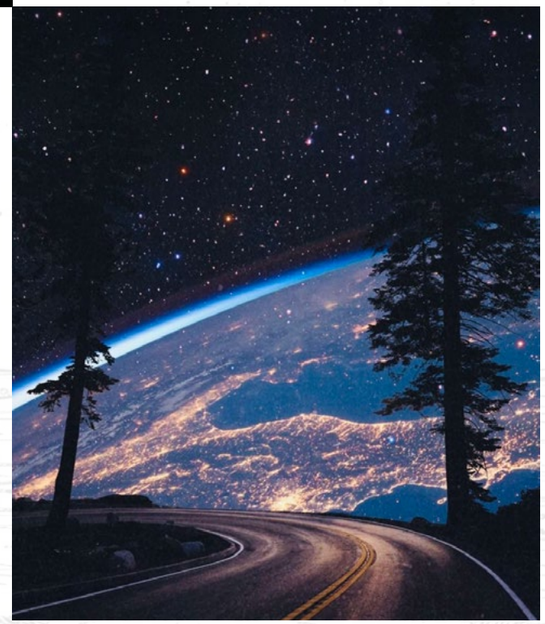

HOMEWARD
COLLECTION

The first three groups direct the eye upward and outward into macro space.

By deconstructing celestial bodies, orbital trajectories, and macromorphic planetary textures, we use striking geometry, rich palettes and colors to replicate the vivid landscape of the universe, creating a powerful visual impact.

The final three groups shift the perspective, transitioning from the vast cosmos down to the fabric of the city.

Capturing intersecting streets, architectural lines, and vignettes of daily life, this deliberate shift evokes a long-awaited sense of freedom and grounding comfort.

T597 City Escape

T595 Evening Commute

T595 Evening Commute archives the fleeting shadows and subdued hues of the transit hour. The aesthetic mirrors metropolitan life through staccato linework and a structured geometric framework, delivering a sophisticated, high-density aesthetic that is both disciplined and dynamic.

T596 Pathless

T596 Pathless explores the narrative of internal wandering.
The pattern juxtaposes a geometric lattice with deep, weathered mottling, creating a tactile metaphor for blurred intuition and the contemplative beauty of solitude.

LA16 Orbit

Bound by a unified cosmic narrative, LA16 Orbit translates the vastness of the cosmos into a grand textile landscape of complex, multi-tonal depths, enhanced by LuxCushion™ Air backing for a perfectly cushioned underfoot experience.

T736 Reentry

T736 Reentry captures the energetic pulse of celestial motion, reimagining trajectories into high-contrast, kinetic textures that charge forward-thinking spaces with momentum.

T737 Earthbound

Bringing the journey back to reality, T737 Earthbound grounds the collection in the raw, geological textures of minerals, stone, and soil. Harmonized in color yet distinct in pattern, these three designs offer a sophisticated, modular solution for visionary interiors.

Harmonized in color and complement in texture, these three designs offer a sophisticated, modular solution for visionary interiors.

T597 City Escape

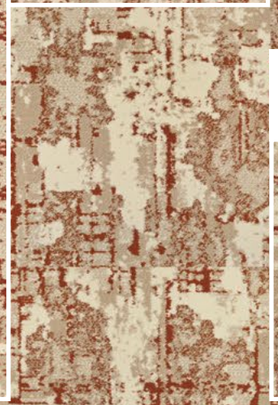

T597 City Escape interprets the momentum of urban departure through a streamlined textile language.
The style pairs parallel, rhythmic linework with a luminous palette to channel the relief of liberation and the revitalizing spirit of a brief getaway.
